PROJECTS

Draw Together | [Demo](#) | [GitHub](#)

A drawing app built with HTML, CSS, JavaScript, and a Node.js backend that connects users together using web sockets to draw on the same canvas.

MERN Calendar | [Demo](#) | [GitHub](#)

A full stack application built with Mongo DB, Node.js, and React that allows users to login and create, edit, or delete events on a calendar.

Pokémon TCG App | [Demo](#) | [GitHub](#)

A website built using React that gets data from an API that contains information for Pokémon cards that user searches for.

WORK EXPERIENCE

Repair Technician

May 2021 - Present

CPR Cell Phone Repair

At CPR Cell Phone Repair, I worked as a repair technician, which consisted of repairing electronic devices including phones, laptop/desktop computers, gaming consoles, and more. These repairs often involved working with strong adhesive, small screws, ribbon cables, and sometimes soldering.

Solutions Specialist

Nov 2019 – May 2021

R Wireless

R Wireless is an authorized retailer for Verizon. At this company I worked as a solutions specialist, which involved providing customer with optimal wireless solutions while also maintaining high sales goals and sometimes providing tech support to customers.

EDUCATION

Schenectady County Community College

2015 - 2016

Schenectady, NY

Completed some courses involved in Computer Science. These courses included learning programming fundamentals with C#, C++, Java, HTML, CSS, and JavaScript.

Capital Region BOCES – Internet Apps and Web Design

2012 - 2014

Albany, NY

BOCES is a career and technical school I attended during my junior and senior years of high school where I learned basic design concepts with HTML and CSS as well as earning a certificate for Adobe Photoshop CS4.
