Sam's Club
- Provide customers with help regarding purchases in my department.

- Maintain sales goals.

EDUCATION

Schenectady County Community College   2015 - 2017
Schenectady, NY
At SCCC I took classes for a computer science degree. These classes involved learning basic programming principles with C#, C++, and Java. I also learned how to develop websites with HTML, CSS, and JavaScript. After obtaining more than half the credits required to finish my degree, I decided to pursue a career in web development as a self-taught learner.
